An approachable instrumental Jazz-Fusion collection, featuring several jazz and contemporary music styles, including Modern Jazz, Funk, Latin, Alternative, World and other influences. Profoundly and wonderfully expansive. Warming. Comforting. Uniting. Inclusive. Open-minded. Pablo Embon's 19th studio album, Harmony Tales, feels like a boundaryless and multi-cultural releasing of great tension; a healing collection of mind-freeing and heart-stirring compositions created by a man who's mastery has reached a level where the music is now allowed to guide him. Throughout the album, stirring and emotional melodies are constantly juxtaposed by light-hearted and whimsical phrasing, creating a balanced dance of opposites, and a soothing exercise in contrast.

A guitar and piano album, on this project, Pablo gives a bit more of a nod to the latter, and he's never sounded better. Jazzy melodies. Bluesy riffs, and melancholy moods unite to form a delicious fusion fancy. This is music for dinner with your lover. A glass of wine at sunset. A moment alone after a long week. The entire album is fresh air. Quite frankly, Pablo Embon is the reason we've come to love Jazz.

Album performed, recorded, mixed and mastered by Pablo Embon from June 2019 through January 2020
